Construction

CONSTRUCTION SERVICES

Tashjian Towers is a licensed C51 Contractor in the State of California. We offer turnkey installation of the towers we produce. We can provide sites surveys, foundation construction, tower erection, antenna and line installations, buildings, building foundation, setting buildings, and fencing. By offering turnkey installations, we can reduce the risk for the tower owner.

Also, we can send our construction crews to map towers for our engineering department. As our crew members are knowledgeable about tower manufacturing, our tower mappings are comprehensive.

Tashjian Towers construction services can provide and set up mobile tower trailers for rental in most California locations.

Rough Order of Magnitude Construction Costs (mobilization not included)

Foundations

Tower	Foundation	Cubic Yards	Price
